Employment History

Senior Frontend Developer, Document Drafter

April 2023 - April 2024

Copenhagen

- Worked on the transition from version 3 to version 4 of the platform
- Improved different parts of the platform by fixing bugs and refactoring
- Improved the quality of the codebase by implementing code standards

Full Stack Developer, Valuer.ai

March 2021 - March 2023

Copenhagen

- Rewrote the entire backend and created new endpoints for the data and research teams
- Built many new frontend features (for CRUD operations) for the data and research teams
- Added unit/integration tests for existing and new features

Junior Full Stack Developer, Hairpal ApS

April 2019 - August 2019

Frederiksberg

- Built a new login system using Node.js, Express and MongoDB
- Built a dashboard for the hairdressers where they can see their future bookings
- Built a calendar view for the hairdressers

Web Development Intern, Hairpal ApS

January 2019 - April 2019

Frederiksberg

- Added more pages and content to Hairpal's websites using React, GatsbyJS, GraphQL and Netlify CMS
- Worked on a calendar link generator (for Google Calendar, iCal and Outlook) which we needed and we also published it on NPM
